RELM Wireless Expands New KNG P25 Product Line
-KNG P400 Company's First-Ever P25 Digital Product in UHF Band-

WEST MELBOURNE, FL, October 23, 2008 – RELM Wireless Corporation (AMEX: RWC) today announced its entry into the market for P25 digital UHF (380-470MHz band) radios with the introduction of the KNG P400. Like its sister VHF product, the KNG P150 introduced earlier this year, the KNG P400 is designed with the demanding needs of professional applications in mind, providing customers with compact, lightweight radios that are feature-rich and offer class-A performance specifications.

In addition to its performance, the KNG-P400 is the smallest professional-grade 5-watt UHF portable digital radio in the market. Its FCC (Federal Communication Commission) certified power rating of 5.7 watts is the best in the industry and provides power to extend the radio's reach with superior signal strength. More efficient power consumption gives the KNG P400 an uninterrupted duty cycle of up to 18 hours -- significantly longer than similarly featured models from other manufacturers. The entire KNG series will be upgradeable to P25 Trunking.

Additional features of the KNG P400 include:

- MIL-STD 810 F
- 512 channels and up to 32 zones
- Ease-of-use with menu-driven programming, Over-the-Air Rekeying (OTAR) and cloning
- Software-driven upgrades (USB PC programmable)
- NIST-certified FIPS 140-2 encryption
- IP67 submersible rating
- Customized keypad and multi-line display

Commented President and CEO David Storey, "Our new KNG product line is the foundation upon which our growth and future will be built. The P400 is a critical addition to the line. RELM has never before offered P25 digital radios in the UHF band, a circumstance that has precluded us from participating in that lucrative segment of the market. The P400 opens to RELM significant opportunities in such agencies as the Departments of Defense and Homeland Security, as well as in law enforcement, among others. Soon

to follow will be products in the 700MHz – 800MHz range, further expanding our entry into markets never before addressed by RELM. All KNG products provide top performance and a wide selection of features at industry-best prices. This represents a critically important combination of advantages that we believe prospective new customers will find attractive, especially considering the budget challenges facing many government and public safety agencies today.”

About RELM Wireless

For more than 60 years, RELM Wireless Corp. has manufactured and marketed high-specification two-way communications equipment for use by public safety professionals and government agencies, as well as radios for use in a wide range of commercial and industrial applications, including disaster recovery. Advances include new interoperable, low-cost digital two-way radios compliant with APCO Project 25 technical specifications. Products are manufactured and distributed under BK Radio, RELM/BK and RELM product lines. The Company maintains its headquarters in West Melbourne, Florida and can be contacted through its web site at www.relm.com or directly at 1-800-821-2900.

This press release contains certain forward-looking statements that are made pursuant to the “Safe Harbor” provisions of the Private Securities Litigation Reform Act Of 1995. These forward-looking statements concern the Company’s operations, economic performance and financial condition and are based largely on the Company’s beliefs and expectations. These statements involve known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the Company, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors and risks include, among others, the following: reliance on contract manufacturers; heavy reliance on sales to the U.S. Government;; federal, state and local budget deficits and spending limitations; limitations in available radio spectrum for use by land mobile radios; general economic and business conditions; changes in customer preferences; competition; changes in technology; changes in business strategy; the debt and inventory levels of the Company; quality of management, business abilities and judgment of the Company’s personnel; and the availability, terms and deployment of capital. Certain of these factors and risks, as well as other risks and uncertainties, are stated in more detail in the Company’s Annual Report on Form 10-K for the year ended December 31, 2007 and in the Company’s subsequent filings with the SEC. These forward-looking statements are made as of the date of this press release, and the Company assumes no obligation to update the forward-looking statements or to update the reasons why actual results could differ from those projected in the forward-looking statements.
